

Oasis

Absorbent Granules

These small absorbent granules absorb and deodorize any liquid bearing odourous spill. "OASIS" makes wet ... dry! OASIS cleans up after untimely accidents in schools, hospitals, factories, service stations, offices, motels, taverns, airlines, buses, taxis, police cars, ambulances, and restaurants. Absorbs any liquid bearing odours found in food processing plants, sanitary sewage plants, incinerators, garbage dumpsters, garbage bags, garbage trucks, garbage chutes and compactors.

Recommendations

Spread OASIS evenly over the area to be treated. Small Spills: allow sufficient time for moisture to be absorbed and deodorizing to take place. Large Areas: granules should be dispensed on an as needed basis to look after any foul or obnoxious odours plus absorbing any odorous bearing liquids.

Use/Benefits

- Non-toxic
- Non-irritating - Safe.
- Takes the unpleasantness out of cleaning up odourous liquids.
- Prevents odours from forming.

Physical Properties

Appearance: Tan granular material

Odour: Fruity
